Soft skills

- Collaboration and teamwork
- Empathy and understanding
- Passion and problem solving
- Giving and receiving feedback
- Self-lead learning and continuous improvement
- Motivating and empowering others
- Simplifying complex ideas simply

About Me

I am experienced in data processing, particularly in the field of marketing research, and have recently transitioned into frontend development.

I have excellent writing and verbal communication skills, and value a collaborative culture of transparency and feedback. I enjoy problem solving, working around both technical and creative challenges to find interesting new solutions.

Work History

● LIA / Internship - Enablers of Sweden

Frontend Developer

Aug 2022 - October 2022

Built an event calendar from scratch. Worked with a team of frontend and backend developers using Agile framework, HTML, CSS, and React.js for the project's development.

● Kantar Added Value

Data Processing Executive

Aug 2006 - July 2017

Coordinate with market research project leaders on data requirements and statistical analysis deliverables. Assist and help newly hired data entry operators.

● Philippine Survey and Research Center

Data Processing Operator (Group Leader)

Feb 1995 - August 2006

Provides assistance to data processing operators. Process collected data from face-to-face research interviews. Run data tables using company provided softwares.
