Technical skills

Soft skills

- Collaboration and teamwork
- Empathy and understanding
- Passion and problem solving
- Giving and receiving feedback
- Self-lead learning and continuous improvement
- Motivating and empowering others
- Simplifying complex ideas simply

About Me

I am experienced in data processing, particularly in the field of marketing research, and have recently transitioned into frontend development.

I have excellent writing and verbal communication skills, and value a collaborative culture of transparency and feedback. I enjoy problem solving, working around both technical and creative challenges to find interesting new solutions.
